

# Revolutionary. Unified. AI Cybersecurity.

## Product Sheet

## Replace countless vendors and disconnected solutions and with an AI-driven, integrated approach to cybersecurity.

### Elevate your enterprise protection with state-of-the-art security.

Given today's threat landscape, you need a crucial line of defense with an inherent advantage over legacy, signature-based solutions. Heimdal's offering has been built following a prevention-first approach, designed to catch all kinds of threats - simple and sophisticated, known and yet unknown.

From Threat Prevention and Endpoint Detection and Response to Vulnerability Management, Privileged Access Management (PAM), Email Security, and Remote Desktop Support, we clear up your most pressing security and compliance concerns - and more.

Heimdal's innovative, layered cybersecurity, powered by AI Neural Network-Driven Intelligence components, can be scaled up and down and will fit any business scenario.

Simple, next-level  
cybersecurity protection.  
Immediately effective.  
Unified.

Multiple deployment tools create confusion, slow down your reaction time, and open your Enterprise to devastating malware and ransomware attacks.

As Cybersecurity can easily become a burden for companies - especially as they grow - Heimdal provides the latest technologies for cutting-edge security, in a unified and easy-to-use package.

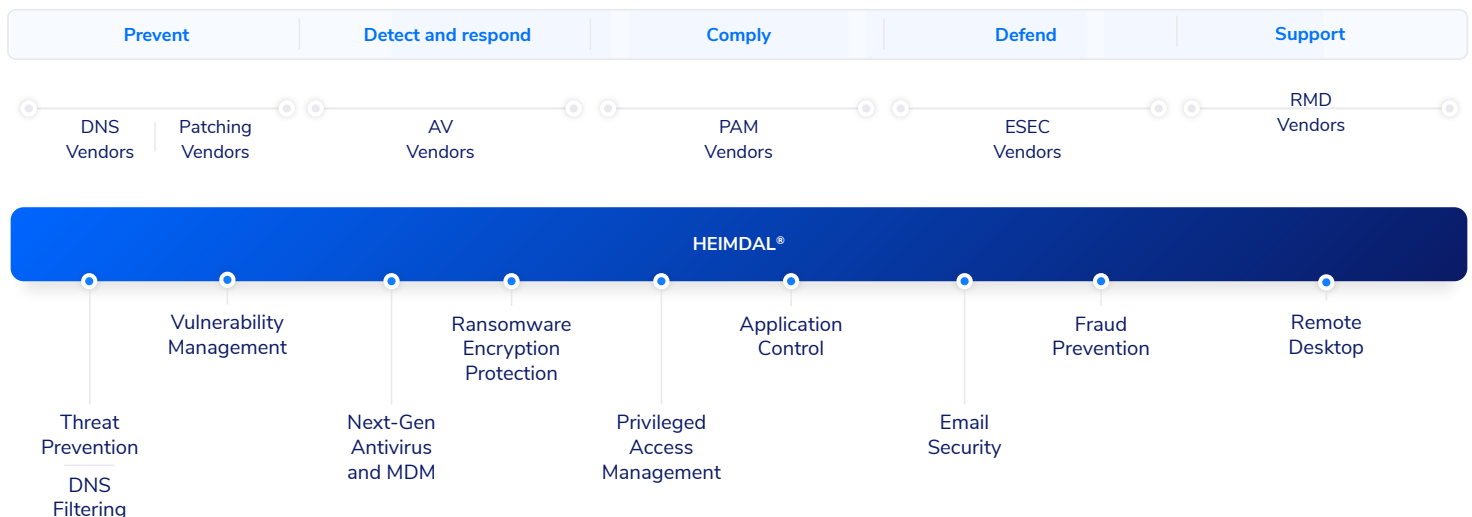

Cybersecurity can be complicated enough as it is, which is why we deliver the best solutions that eliminate the need to sacrifice countless man-hours to make it all work.

### Add the security layers you need. Unlock extra features and unexpected benefits.

Seamlessly integrated and fueled by Artificial Intelligence, the more modules you embed into your Heimdal ecosystem, the more intelligent it becomes.

And above all, you can conveniently manage everything from a single agent. Forget about disconnected solutions and gain a deep understanding and a complete overview of your environment, in real time.

# Prevent. Detect. Respond.

AI Neural Network Driven Intelligence. Also available with a managed XDR service.

Threat Prevention Block known and unknown threats at the traffic-level.		Vulnerability Management Manage assets and mitigate vulnerabilities.		Endpoint Detection and Response Mitigate and respond to next-gen threats.	
DNS, HTTP & HTTPS filtering		Patch, Deploy and Manage Assets		Next-Gen Antivirus and MDM	
<p>Network &amp; Endpoint Prevention, Detection and Response</p> <p>Use the world's most advanced DNS product to Hunt advanced threats, infected users &amp; processes</p> <p>Predict tomorrow's threats with AI-driven Neural Network Predictive DNS</p> <p>Network log agent included for infection tracing.</p>		<p>The most scalable and flexible patch and deployment product.</p> <p>Preemptive and Full Vulnerability Management</p> <p>Granular control of patches, installations and deployments</p> <p>Software asset management</p> <p>Global software deployment</p> <p>Patch and Deploy - Anything, Anytime, Anywhere.</p>		<p>4 Advanced malware detection layers</p> <p>Certified detection rate of 100% for known malware</p> <p>Live process monitoring</p> <p>Lightweight and simple to use</p> <p>Remove threats with ease</p> <p>Full E-PDR solution with Threat Prevention DNS</p>	
				Ransomware Encryption Protection	
				<p>Detect processes that launch file encryptions</p> <p>Kill and stop any ransomware outbreaks</p> <p>Works signatureless</p> <p>Works with to ANY Antivirus</p> <p>Tracks attacker origin</p>	

# Access Control, E-Mail Protection and UEM.

Unified Management in one place. Also available with a managed XDR service.

Privileges & Application Control Manage, audit and comply in one easy step.		Email Protection Eliminate the hassle and danger of email-borne threats.		Remote Desktop Securely connect to other devices
Privileged Access Management		Application Control		Email Security
				Email Fraud Prevention
<p>Easy escalation of rights and files</p> <p>Full control of the escalation process</p> <p>World's only de-escalation upon threat discovery tool</p> <p>Auto-approval mode to avoid user support time</p> <p>Mobile approval supported</p> <p>Full Audit Trail</p> <p>Removes 93% of Microsoft vulnerabilities</p>		<p>Includes the ability to White and Blacklist any execution</p> <p>Easy control of access to execution of files</p> <p>Ability to easily manage spawns of any files executed</p> <p>World's only Application Control that can be tied with PAM</p> <p>Handle access by File Path, MD5, Publisher, Certificate or Software Name</p>		<p>MX Record based and easy to implement</p> <p>Highly advanced malware detection*</p> <p>Detect Spam</p> <p>Filter Emails with malicious IP's, Domains and URL's</p> <p>Stop Phishing mails</p> <p>Remove malware attachments</p> <p>Quarantine report to the user</p>
				<p>Detect CEO Fraud</p> <p>Detect Financial Fraud</p> <p>Spot Insider Business Email Compromise</p> <p>Find imposter threats</p> <p>Stop advanced malware mails</p> <p>Stop incorrect IBAN / Accounts numbers</p> <p>125 vectors of Mail Fraud intelligence</p>
				<p>Connect to any device with an agent</p> <p>Multi-Factor Authentication</p> <p>Attended / Unattended Access i.e. End user request or IT accessed</p> <p>Works with PAM through the session</p> <p>Clipboard Sharing</p> <p>Video Recording and Audit Log option</p>

## AI-driven security tools that intelligently work together.

Combine Threat Prevention and Endpoint Detection X-Gen Antivirus. Give yourself proactive IOC's and enhanced IOA's. Threat Prevention enriches our Endpoint Detection X-Gen Antivirus, with a unique E-PDR ability, to mitigate even concealed or unknown malware.

Our security technologies can be layered and customized to fit any business scenario and will cover all potential security gaps in your organization.

## Here's how the Heimdal® modules work together.

## About Heimdal®

HEIMDALSECURITY.COM

Founded in 2014 in Copenhagen, Denmark, Heimdal® is a leading European provider of cloud-based cybersecurity solutions.

The company offers a multi-layered security suite that combines threat prevention, patch and asset management, endpoint rights management, and antivirus and e-mail security which together secure customers against cyberattacks and keep critical information and intellectual property safe.

Heimdal has been recognized as a **thought leader in the**

**industry** and has won multiple awards both for its solutions and for its educational content.

Currently, Heimdal's cybersecurity solutions are deployed in **more than 50 countries** and supported regionally from offices in 15+ countries, by 175+ highly qualified specialists. Heimdal is ISAE 3000 certified and secures **more than 3 million endpoints** for over 11,000 companies.

The company supports its partners without concessions on the basis of predictability and scalability, creating sustainable ecosystems and **strategic partnerships**.
